

Take your vault to the next level with AAI® Evo-Boards. Predictable and consistent rebound action giving maximum return of energy input.

Stop pinching fingers or bruising knuckles and join the evolution in vaulting.

Normal springs wear down due to metal fatigue caused during compression. Evo-boards use the next evolution in leaf springs to remain consistent and last longer.

- Evo-Boards have a **LARGER SWEET SPOT** allowing for variations in entry position.
- These progressive boards are color coded to help determine which board your athlete will need.
- Softer and less jarring feel allowing for more repetition.
- Welded aluminum frame with handle for easy transport.
- Anti-fatigue mat provides a unique softer feel on hands or feet.

No more changing springs or worrying which spring goes to which board with AAI® Evo-Boards.
